

Life and Me

I hear children playing and mothers are saying wont you come in for the night
I know it is late and theres one thing i hate thats when it gets dark it gets quiet
Im burning a candle it s the only companion that gives me some comfort tonight
I don't want to sleep cause i know i will meet the ghosts in my dreams before morning

Right at this time lifes no friend of mine keeps throwing things down at my feet
This morning is cold and I'm lost with my soul I feel like a drunk on the street
When love and affection it changes direction can bring you right down to your knees
Well thats when it seems that all of your dreams no longer are burning with passion

CHORUS

Here I go again life and me chasing away at these crazy crazy dreams
It might take a while but someday I'll smile just you wait and see
Here I go again life and me

I've been to places I've seen hopeless cases I guess it's a lesson I've learned
When war torn streets and poverty meet its the innocent ones that burn
Now I know it's time to make up my mind and get myself back on my feet
So take my advice there's more to this life tonight I will let myself sleep

CHORUS
